

**THIS WEEKEND**  
☑ ENHANCE YOUR PRIVACY WITH SCREENING

**Bamboo screens offer natural beauty and complement any garden style**

**D**o you want a natural, eco-friendly way to block out an unsightly view or add privacy to an outdoor entertaining area? If so, bamboo screens are ideal. And if you're looking for a wide selection of quality bamboo screens, Bamboo Habitat's range is as extensive as it is impressive.

Bamboo Habitat offers an easy-to-manage panel width of 1.2m. This makes the panels lighter and installation simple. It also allows you to give full rein to your creativity as the screens can be joined for a continuous, seamless look or framed for a more structured style.

In addition, you also have a choice of pole thickness and height. This allows you to customise a screening, fencing or cladding solution to perfectly fit your outdoor design. You can also avail yourself of Bamboo Habitat's

personalised custom-made service should your requirements fall outside their standard range.

The majority of the range is now smoked using traditional firing methods. This gives the bamboo screens a wonderful earthy scent and a scorched woody-brown tone — the perfect natural backdrop to plantings, garden art or water features.

The Smoked Congo screen, featured here, is comprised of 30mm full bamboo poles with a staggered finish at the top, which ranges from 1.8m at its shortest point up to 2.1m at the tallest point. The result is a stylish screen that is perfect for disguising raking, sloping or uneven fence lines.

All Bamboo Habitat screens are strung internally with 3mm galvanised wire which ensures they stay structurally sound for around 15 years, even near salt water or in

sandy and windy environments. To protect the finish, Bamboo Habitat offers an exclusive UV-resistant tinted Bamboo Honey marine varnish to keep the colours of the bamboo screens looking fresher longer.

For customers in the Sydney metropolitan area and on the New South Wales' South Coast, Bamboo Habitat offers an installation service and for those unable to collect their screens from the company's Sydney warehouse, door-to-door delivery can be arranged.
